

# EasySave 1.0 version

## User manual

EasySave backup software is a tool for creating and executing full and differential backup jobs from your local hard drives, external drives or network drives.

Since version 1.0 is produced in console mode, any interaction with the proposed menus is done by writing the number corresponding to the chosen option, followed by the enter key.

### Create a backup job:

```
Welcome to the EasySave application!  
What do you want to do?  
Choose one of the options (1,2,3):  
1-Safeguarding work  
2-See the logs  
3-Change language
```

*Figure 1 - Home menu*

### Manage backup jobs:

```
What do you want to do?  
Choose one of the options (1,2,3,4,5):  
1-Run existing backup job  
2-Create  
3-Modify  
4-Delete  
5-Return
```
